Digital Marketing Strategy

B2C Student Acquisition

Cornerstone Performance Solutions

Prepared by Broadbrand | March 2026

Focus: HCIB (Higher Certificate in Banking) & ACL6 (Advanced Certificate in Leadership)

Target: 35 students per qualification per intake | R400 CPA | Launch: May 10, 2026

1. Executive Summary

This strategy positions Cornerstone Performance Solutions to achieve its B2C enrollment targets of 35 students per qualification per intake across two programmes (HCIB and ACL6), with a target cost per acquisition of R400 per enrolled student. Based on our comprehensive audit, five workshop sessions with the CPS leadership team, and analysis of the competitive landscape, we have identified that CPS's core challenge is not product quality — it's the gap between the strength of the education offering and the weakness of the student-facing experience that surrounds it.

The current digital presence speaks to organisations, not individuals. Prospective students cannot find clear answers to their most fundamental questions: What will I learn? What will it cost? What career will it lead to? How long will it take? This strategy addresses these gaps through a coordinated approach across six workstreams: audience psychology, website CRO, messaging and copy, content strategy, paid media, and a phased launch plan tied to the May 10 intake.

With a starting media budget of R15,000/month across Google and Meta, scaling with traction, and two intakes per year to start, this plan is designed to be lean, measurable, and built for compounding returns.

2. Situation Analysis

2.1 Where CPS Stands Today

CPS is a 25-year-old education company in strategic transition. Under new leadership, it is shifting from a predominantly B2B model (serving banks and financial institutions) to building a sustainable B2C direct-to-student channel. The business currently derives approximately 70% of revenue from B2B and targets 30% from B2C.

2.2 The B2C Challenge

- No historical B2C performance data exists — the previous agency retained all analytics and IP
- The current website was a quick rebuild (Next.js on Vercel) but is not optimised for B2C conversion
- Google Ads are running but generic — focused on NQF levels and SAQA IDs rather than career outcomes
- No Meta (Facebook/Instagram) ads are currently active
- Lead nurturing flows do not exist — some form submissions receive no confirmation email
- The application form is an 8-step process with a R300 fee, creating significant friction
- Brand awareness among individual students is low — CPS is known in banking boardrooms, not on social media

2.3 What CPS Has Going For It

- Proprietary learning platform (CPSLearn) with AI-powered personalised learning, reflection tools, and AI marking — no competitor has this integration level
- BEE Level 1 accreditation — critical for corporate clients and students seeking SETA funding
- 11,400+ professionals trained across SA's biggest banks (Absa, Standard Bank, FNB, Capitec, Nedbank, etc.)
- Brandon Hall Awards for learning excellence — equivalent to the Oscars in L&D
- Competitive pricing: approximately 20% below major competitors
- Council on Higher Education and QCTO accreditation on qualifications
- Trademarked methodologies: RAMPed, Business Impact Learning, Digital Process Facilitation
- Fastest assessment turnaround in market (AI marking: 2–3 minutes vs 45–60 minutes human)

3. Target Audience & Decision Psychology

3.1 Primary Personas

Persona 1: The Banking Starter (HCIB)

Demographics: Age 22–32, matric graduate or career changer, based in Gauteng/WC/KZN metros, currently employed in entry-level banking or retail, or unemployed seeking entry into financial services.

Psychographics: Ambitious but uncertain. Fears wasting money on a qualification that won't lead anywhere. Researches extensively before committing. Compares CPS against Milpark, MANCOSA, Regent, and university options. Price-sensitive but willing to invest if the outcome is clear. Motivated by career mobility and financial independence.

Jobs to Be Done: "Help me get a real qualification that banks actually recognise, so I can build a career in banking and earn more."

Persona 2: The Aspiring Leader (ACL6)

Demographics: Age 28–40, currently employed in financial services or professional services, 3–7 years work experience, seeking management/leadership roles, based in SA metros.

Psychographics: Has hit a career ceiling. Knows they need formal credentials to advance. Values practical, applicable learning over academic theory. Time-poor and needs flexibility. Wants to be taken seriously as a leader and not just be "another employee."

Jobs to Be Done: "Help me prove I'm ready for management and get the qualification that unlocks the next level."

3.2 Psychological Framework

Based on the Marketing Psychology skill analysis, the following psychological principles are most critical for CPS's B2C conversion:

Principle	Application to CPS	Implementation
Loss Aversion	Students fear wasting money more than they desire gaining a qualification. Frame messaging around what they lose by NOT acting.	"Every month you wait is a month you're not earning what you could be." Use intake deadlines as genuine urgency.

Social Proof / Bandwagon	Low brand awareness means students need reassurance from peers.	Student testimonial videos, graduate count (11,400+), banking client logos, pass rate data, and "students like you" narratives.
Authority Bias	CHE accreditation, BANKSETA awards, and partnerships with SA's top banks are underused trust signals.	Lead every landing page with accreditation badges. Feature CPS CEO's PhD credentials. Show banking partner logos prominently.
Goal-Gradient Effect	The 8-step application form kills momentum. Students who see they're close to finishing are more likely to complete.	Redesign the form as a progress-tracked 3-step process. Show "Step 2 of 3" and a completion bar.
Commitment & Consistency	Get micro-commitments before asking for the R300 application fee.	Offer a free info pack download or career quiz as the first action. Once someone has identified themselves as interested, they're more likely to apply.
Regret Aversion	Students fear choosing the wrong programme.	Money-back guarantee messaging, "Speak to an advisor before you apply" option, programme comparison tool.
Present Bias	Future career benefits feel abstract. Immediate benefits feel real.	"Start learning this month." "Get your first module within 48 hours of enrollment." Emphasise the immediate experience.
Contrast Effect	CPS is 20% cheaper than competitors but doesn't lead with this.	Show competitor pricing benchmarks. "University-level qualification. Not university-level fees."

4. Website & Conversion Strategy

4.1 Current State Assessment

The audit identified that CPS's website is built for organisations, not students. The homepage speaks to "adaptive education solutions" and "capability development" — language that resonates in a boardroom but creates confusion for a 25-year-old looking to start a banking career. Key findings:

- No student-facing value proposition on the homepage
- No segmentation for B2B vs B2C audiences
- Critical information (pricing, modules, outcomes) hidden behind forms or in PDF brochures
- Mobile performance score of 44/100 (due to heavy Divi theme, duplicate scripts, unoptimised images)
- Inconsistent form types across qualifications (multi-step, Pipedrive, pop-ups, generic contact forms)
- No email confirmation on some form submissions — students feel "scammed"
- Multiple competing CTAs with no clear hierarchy

4.2 Redesign Priorities

The website rebuild should be structured around the student decision journey, not the product catalogue. The information architecture should answer questions in the order students ask them:

Student Question	Where to Answer	Current Gap
"What can I study?"	Homepage hero + programme cards with clear positioning	Homepage talks about organisations, not programmes
"Is this right for me?"	Programme pages with career outcomes, ideal-for sections, time commitment	Programme details hidden in brochures
"What will it cost?"	Transparent pricing on every programme page with payment options	Pricing only visible after form fill or in PDF
"Can I trust these people?"	Trust bar: accreditation badges, partner logos, graduate count, testimonials	Trust signals scattered or absent
"How do I apply?"	Simplified 3-step application with progress bar, auto-confirmation	8-step form, R300 fee upfront, no email confirmation
"What happens next?"	Clear post-application journey: timeline, next steps, support contacts	No post-submission communication in some cases

4.3 Landing Page Strategy

Each qualification needs a dedicated landing page optimised for paid traffic. These pages must operate independently from the main site navigation and follow a single-path conversion architecture:

Landing Page Blueprint (per qualification)

- Hero section: Outcome-focused headline + qualification badge + single CTA
- Social proof bar: Graduate count, banking partner logos, accreditation badges
- "Is this for you?" section: Target persona description, prerequisites, time commitment
- Programme structure: Module overview with expandable details (not hidden in PDFs)
- Career outcomes: Specific roles this leads to, salary benchmarks where available
- Pricing section: Monthly payment prominently displayed, total cost, payment options, comparison to competitors
- Student stories: 2–3 testimonials with photos, names, and outcomes
- FAQ section: Address top 5 objections (cost, time, difficulty, recognition, support)
- Sticky CTA: "Download Info Pack" (soft) and "Apply Now" (hard) — dual conversion paths

4.4 Conversion Funnel Design

The current funnel pushes directly from ad to application. This creates friction because students are not yet committed. The redesigned funnel introduces a micro-conversion step:

Awareness → Paid ad / organic content → Interest → Landing page with dual CTA → Consideration → Info pack download / career quiz (captures email + phone) → Nurture → Email + WhatsApp sequence (3–5 touchpoints over 7–14 days) → Application → Simplified form → Enrollment → Admissions follow-up + payment setup

5. Messaging & Copy Framework

5.1 Core Positioning Statement

"CPS gives you a university-level banking or leadership qualification — accredited, flexible, and trusted by South Africa's biggest banks — so you can build a career that matters."

5.2 Messaging Hierarchy

Based on the copywriting skill framework, messaging must lead with benefits, not features. Here is the messaging hierarchy for each programme:

HCIB Messaging

Layer	Message
Primary benefit	Launch a real banking career with a qualification SA's top banks trust
Supporting benefit 1	Study online, at your own pace, while you work
Supporting benefit 2	R2,480/month — less than most university fees, with better career outcomes
Supporting benefit 3	AI-powered personalised learning adapts to your gaps and strengths
Trust signal	Accredited by the Council on Higher Education | NQF 5 | 11,400+ graduates
Objection handler	No matric exemption needed — just your NSC and the drive to succeed
Urgency	Next intake: [date] — limited places available

ACL6 Messaging

Layer	Message
Primary benefit	Get the leadership qualification that opens the door to management
Supporting benefit 1	Built for working professionals — 100% online, 12 months
Supporting benefit 2	R2,688/month — an investment in your next promotion
Supporting benefit 3	Practical leadership frameworks you can apply at work immediately
Trust signal	Developed with SA's leading banks | NQF 6 | Brandon Hall Award-winning methodology
Objection handler	Designed for professionals with 3+ years experience, not academic theorists
Urgency	Intake closes [date] — start your leadership journey this quarter

5.3 Ad Copy Angles

Based on our psychological framework, we recommend testing these copy angles across Google and Meta:

Angle 1: Career Transformation (Loss Aversion + Contrast)

"Still stuck in the same role? A Higher Certificate in Banking could change that. Accredited. Flexible. Trusted by Absa, FNB, Standard Bank, and more. From R2,480/month."

Angle 2: Social Proof + Authority

"Join 11,400+ professionals who've built their careers with CPS. NQF-accredited qualifications designed with SA's top banks. Applications now open."

Angle 3: Present Bias + Simplicity

"Start your banking qualification this month. Study online. Pay monthly. Graduate in 12 months. Download the free info pack."

Angle 4: Aspiration + Specificity (ACL6)

"Ready to lead? The Advanced Certificate in Leadership (NQF 6) gives you the frameworks, credibility, and accreditation to step up. From R2,688/month."

6. Content Strategy

6.1 Content Pillars

Using the Content Strategy skill framework, we recommend four content pillars that serve both searchable (SEO) and shareable (social) purposes:

Pillar	Purpose	Content Types	Primary Channel
Career Pathways	Capture search intent from people exploring banking/leadership careers	Blog posts, career guides, salary insights, "day in the life" features	Google / SEO
Student Stories	Build social proof and emotional connection	Video testimonials, written case studies, before/after narratives	Meta / Instagram / TikTok
Industry Insights	Position CPS as a thought leader in banking education	Articles on banking trends, SETA/QCTO updates, skills gap data	LinkedIn / Blog
Study Life	Reduce uncertainty and build community	"What to expect" guides, student day-in-the-life, study tips, platform walkthroughs	Instagram / WhatsApp / TikTok

6.2 SEO-Driven Content (Searchable)

These are high-intent blog posts targeting people actively searching for banking qualifications and career information:

- "Higher Certificate in Banking: Everything You Need to Know in 2026" (targets: higher certificate in banking, HCIB, NQF 5 banking)
- "How to Start a Career in Banking in South Africa (With or Without a Degree)" (targets: career in banking SA, banking jobs no degree)
- "HCIB vs BCOM: Which Banking Qualification is Right for You?" (targets: comparison keywords, high consideration intent)
- "What is NQF Level 5? A Simple Guide for South African Students" (targets: NQF explainer searches)
- "Leadership Qualifications in South Africa: Your Complete Guide" (targets: leadership qualification SA, NQF 6 leadership)
- "How Much Does a Banking Qualification Cost in 2026?" (targets: cost-comparison searches, highly commercial intent)
- "Is CPS Accredited? Understanding CHE and QCTO Accreditation" (targets: brand + trust searches)

6.3 Social-First Content (Shareable)

These content formats require minimal production budget and can be created with smartphones and basic editing:

- Student talking-head testimonials (30–60 second selfie-style videos for Reels/TikTok)
- "I went from [X] to [Y]" transformation posts (static image with text overlay for feed)
- "3 things I wish I knew before studying banking" (carousel posts for Instagram/LinkedIn)
- CPS campus/platform walkthrough content (screen recordings of CPSLearn platform)
- "Study with me" content from current students (authentic, low-production, relatable)
- Quick Q&A with CPS faculty/facilitators (builds human connection and authority)
- Graduation day content (photos and short clips — powerful emotional proof)

7. Paid Media Strategy

7.1 Budget & Allocation

Starting budget: R15,000/month, increasing with traction. We recommend a 50/50 split between Google and Meta to start, shifting based on early performance data. This balanced approach lets us capture high-intent search demand while simultaneously building awareness and pipeline through social.

Channel	Monthly Budget	Objective	Key Metrics
Google Search	R7,500 (50%)	Capture high-intent searchers actively looking for banking/ leadership qualifications	CPC, CTR, Cost per lead, Cost per application
Meta (FB + IG)	R7,500 (50%)	Build awareness among target personas, drive info pack downloads, and retarget website visitors	CPM, CTR, Cost per lead, Landing page view rate

7.2 Google Ads Strategy

Campaign Structure

We recommend three campaign types, launched in phases:

Campaign 1: Brand Search (Always on)

- Keywords: "CPS", "Cornerstone Performance Solutions", "CPS banking", "CPS HCIB"
- Purpose: Capture branded searches and protect against competitors bidding on CPS name
- Budget: R1,000/month (low CPC expected)

Campaign 2: High-Intent Non-Brand (Core)

- Keywords: "higher certificate in banking", "banking qualification online", "NQF 5 banking course", "leadership qualification South Africa", "advanced certificate in leadership", "banking course online SA"
- Match types: Phrase and exact match only — avoid broad match initially
- Ad extensions: Sitelinks (Pricing, Modules, Apply Now, Download Info Pack), Callouts (Accredited, 100% Online, From R2,480/month), Structured snippets
- Budget: R5,500/month

Campaign 3: Competitor Conquesting (Phase 2)

- Keywords: Competitor names + qualification terms (Milpark banking, MANCOSA leadership, Regent banking course)
- Purpose: Intercept students comparing options
- Ad copy: Focus on CPS differentiators (price, flexibility, bank partnerships)
- Budget: R1,000/month

7.3 Meta Ads Strategy

Audience Targeting

Audience	Targeting Approach	Programme
Banking career seekers	Interest: Banking, Financial services, Career development. Age 22–32. Location: SA metros	HCIB
Working professionals	Interest: Leadership, Management, Professional development. Age 28–40. Employment: Financial services	ACL6
Lookalike audiences	Once 50+ leads collected: build 1% lookalike from lead list	Both
Retargeting	Website visitors (30 days), Landing page viewers, Info pack downloaders who haven't applied	Both

Ad Formats & Creative

Given limited production budget, we recommend these formats in priority order:

- Static image ads with bold text overlays (Canva-producible, test 3–4 variations per angle)
- Carousel ads showing programme benefits (1 benefit per card, final card = CTA)
- Student testimonial UGC-style videos (selfie videos from real students, shot on phone — these consistently outperform polished ads in education)
- Reels-format short video (15–30 sec: hook + benefit + CTA, optimised for Instagram/Facebook placement)

7.4 CPA Modelling

Working backwards from the R400 CPA target with a 50/50 Google/ Meta split. Note: Google CPCs in the SA education vertical typically range R12–R20, while Meta CPCs are significantly lower at R5–R8. The blended CPC benefits from Meta's lower cost per click driving volume.

Metric	Conservative	Target	Optimistic
Monthly media spend	R15,000	R15,000	R15,000
Google budget (50%)	R7,500	R7,500	R7,500
Meta budget (50%)	R7,500	R7,500	R7,500
Google CPC (education vertical)	R20	R15	R12
Meta CPC	R8	R6	R5
Google clicks/month	375	500	625
Meta clicks/month	938	1,250	1,500
Total clicks/month	1,313	1,750	2,125
Blended CPC	R11.43	R8.57	R7.06

Landing page conversion rate (to lead)	4%	7%	10%
Monthly leads	53	123	213
Lead-to-enrollment rate	10%	15%	20%
Monthly enrollments	5	18	43
Effective CPA (per enrolled student)	R2,857	R816	R353
Enrollments per intake (6 months)	32	110	255
Target per intake	70	70	70

Key Takeaways from the Model

- The Target scenario (R816 CPA) exceeds the 70-enrollment-per-intake goal with 110 enrollments over 6 months. This provides margin even if lead quality or conversion rates underperform initially.
- The Conservative scenario (R2,857 CPA) falls short at 32 enrollments per intake. This scenario reflects poor landing page conversion (4%) and low lead-to-enrollment rates (10%) — conditions we can avoid through proper CRO, nurture sequences, and admissions follow-up.
- At the R400 CPA target, R15k/month would produce approximately 38 enrollments per month, or 225 per intake — 3x the target. This means the R400 CPA is achievable if the funnel performs at or above Target assumptions.
- The critical levers are: (1) landing page conversion rate (CRO work in Section 4), (2) lead-to-enrollment rate (nurture sequences in Section 8), and (3) CPC management through ad quality and relevance.
- At R400 CPA, acquiring 70 students costs R28,000 in total media. With R90,000 available per intake (R15k × 6 months), there is R62,000 of headroom for awareness building, retargeting, and content amplification beyond direct acquisition.

8. Lead Nurturing & Email/WhatsApp Strategy

8.1 The Nurture Gap

The audit revealed that after form submission, some students receive no confirmation email, no follow-up, and when they reach out via WhatsApp, get no response. This is the single biggest leak in the current funnel. A student who has shown intent and gets silence will not apply.

8.2 Automated Nurture Sequence

Broadbrand will build and manage the following automated sequences:

Info Pack Download Sequence (7 emails over 14 days)

Day	Email	Purpose
Day 0	Info pack delivery + Welcome	Deliver value, set expectations, introduce CPS
Day 2	"Why students choose CPS" (social proof)	Student testimonial + partner logos + accreditation
Day 4	Programme deep-dive (modules, outcomes, schedule)	Answer the questions they're still researching
Day 7	"Is this right for you?" (objection handling)	Address cost, time commitment, difficulty concerns
Day 9	Student story: transformation narrative	Emotional proof — someone like them who succeeded
Day 11	Pricing breakdown + payment options	Remove financial uncertainty, show affordability
Day 14	"Applications closing soon" + direct CTA	Urgency + clear next step to apply

8.3 WhatsApp Touchpoints

WhatsApp is the dominant communication channel in SA. We recommend:

- Automated WhatsApp confirmation within 5 minutes of any form submission
- WhatsApp follow-up at Day 3 and Day 10 with personal message from an admissions advisor
- WhatsApp community group for prospective students (builds peer connection pre-enrollment)
- Quick-reply buttons for common questions (pricing, start dates, application process)

9. Launch Plan — May 10 Intake

9.1 Timeline

Working backwards from the May 10 intake opening, here is the phased launch plan:

Phase	Dates	Activities	Deliverables
Phase 0: Foundation	Mar 11 – Mar 28	Analytics setup (GA4, GTM, conversion tracking), CRM/ Pipedrive configuration, email automation build, WhatsApp Business setup, landing page wireframes and copy	Tracking infrastructure live, nurture sequences built, landing page designs approved
Phase 1: Soft Launch	Mar 29 – Apr 18	Landing pages live, Google brand + high-intent campaigns launch, Meta awareness campaigns launch, info pack lead magnet created, first 3 blog posts published, social content calendar begins	First leads captured, baseline CPCs and conversion rates established, initial lead quality assessment
Phase 2: Ramp	Apr 19 – May 9	Optimise ad creative based on Phase 1 data, launch retargeting campaigns, competitor conquesting begins, email sequences firing, WhatsApp follow-ups active, A/B test landing page variants	Cost per lead trending toward target, nurture sequences converting, 50% of enrollment target pipeline built
Phase 3: Intake Push	May 10 – Jun 10	Urgency messaging activated ("intake now open, limited places"), retargeting intensified, direct outreach to warm leads, social proof content amplified, WhatsApp community active	35 students enrolled per qualification (70 total)
Phase 4: Review	Jun 11 – Jun 30	Full performance review, CPA analysis, channel attribution report, learnings documented, strategy adjustment for Intake 2	Performance dashboard, optimisation recommendations, Intake 2 plan

9.2 Pre-Launch Checklist

Before any ad spend begins, these must be in place:

Item	Owner	Status

GA4 + GTM installed with conversion events (lead, application, enrollment)	Broadbrand	To do
Pipedrive CRM configured for B2C lead flow	Broadbrand + CPS	To do
HCIB landing page live with pricing, modules, outcomes, testimonials	Broadbrand	To do
ACL6 landing page live with same structure	Broadbrand	To do
Info pack PDF created for each qualification	Broadbrand + CPS	To do
Email nurture sequence (7 emails) built and tested	Broadbrand	To do
WhatsApp Business automated responses configured	Broadbrand + CPS	To do
Google Ads account structured and campaigns ready	Broadbrand	To do
Meta Ads account configured with pixel and events	Broadbrand	To do
Looker Studio dashboard connected and shared	Broadbrand	To do

10. Measurement & KPIs

10.1 North Star Metric

Enrolled students per intake at or below R400 CPA. Everything else — traffic, leads, click-through rates — is a leading indicator in service of this outcome.

10.2 KPI Dashboard

KPI	Target	Frequency
Enrolled students (per qualification per intake)	35	Per intake
Cost per acquisition (CPA)	≤ R400	Monthly
Cost per lead (info pack download or form fill)	≤ R100	Weekly
Landing page conversion rate (visitor to lead)	≥ 8%	Weekly
Lead-to-enrollment conversion rate	≥ 20%	Monthly
Email open rate (nurture sequence)	≥ 35%	Weekly
Email click rate (nurture sequence)	≥ 5%	Weekly
Google Ads CTR	≥ 5%	Weekly
Meta Ads CTR	≥ 1.5%	Weekly
WhatsApp response rate	≥ 60%	Weekly
Website traffic (organic + paid)	Growth MoM	Monthly

10.3 Reporting Cadence

- Weekly: Automated Looker Studio dashboard (live access for CPS team) with spend, leads, CPA, and channel performance
- Bi-weekly: Broadbrand performance call with CPS — reviewing data, discussing optimisations, and flagging issues
- Monthly: Full report with insights, creative performance breakdown, A/B test results, and recommendations
- Post-intake: Comprehensive intake review with enrollment data, full-funnel attribution, and strategy updates for next intake

11. Budget Summary

Line Item	Monthly Cost	Notes
Google Ads media spend	R7,500	50% of media budget; scales with performance
Meta Ads media spend	R7,500	50% of media budget; scales with performance
Total media spend	R15,000	Starting budget, increases with traction
Agency retainer (Broadbrand)	Per agreement	Covers strategy, creative, CRO, reporting, nurture management
Content production	Minimal additional	UGC-style content, Canva creatives, blog posts included in retainer
Software/tools	CPS existing	GA4 (free), GTM (free), Looker Studio (free), Pipedrive (CPS existing)

At the target CPA of R400, acquiring 70 students per intake (35 per qualification) costs R28,000 in media spend. With R15,000/month over a 6-month intake cycle, total available media is R90,000 — providing significant headroom for awareness building, retargeting, and content amplification beyond direct acquisition.

12. Risks & Mitigations

Risk	Impact	Mitigation
Website not rebuilt in time for launch	High	Launch with standalone landing pages (Unbounce or similar) independent of main site. Main site rebuild runs in parallel.
Google CPCs too high in education vertical	Medium	Shift budget toward Meta. Add long-tail keyword campaigns. Test YouTube pre-roll as lower-cost awareness.
Low lead-to-enrollment conversion	High	Implement nurture sequences before ads launch. Add WhatsApp follow-up. Assign dedicated admissions advisor to B2C leads.
Limited testimonial/social proof content	Medium	Start collecting student video testimonials immediately. Use banking partner logos and graduate stats as interim proof.
CPS admissions team capacity for B2C leads	Medium	Define SLA for lead response time (under 4 hours). Automate first touchpoints. Broadbrand to build initial nurture; CPS admissions handles warm handoff.
Regulatory changes to qualifications	Low-Med	Monitor QCTO/CHE announcements. Build messaging flexibility into campaign structures. Focus on outcomes rather than qualification names in ads.

13. Immediate Next Steps

To hit the May 10 launch window, the following actions are required in the next two weeks:

Action	Owner	Deadline
Approve strategy and confirm May 10 intake date	CPS	Mar 14
Provide access to GA4, Google Ads, and Meta Business Suite	CPS	Mar 17
Share 3–5 student contact details for testimonial collection	CPS	Mar 17
Confirm programme pricing, intake dates, and application process for HCIB + ACL6	CPS	Mar 17
Begin landing page wireframes and copy drafts	Broadbrand	Mar 21
Set up GA4, GTM, and conversion tracking	Broadbrand	Mar 24
Build email nurture sequences in chosen platform	Broadbrand	Mar 28
Landing pages live for review	Broadbrand	Mar 28
Google Ads campaigns ready for launch	Broadbrand	Mar 28
Meta Ads creative and audiences configured	Broadbrand	Mar 28
Soft launch: Ads go live	Broadbrand	Mar 29
